Serial No.: 10/667,922  
Filed: September 22, 2003  
Confirmation No.: 9900

### **Amendments to the Claims**

This listing of claims will replace all prior versions, and listings, of claims in the application.

### **Listing of the Claims:**

Claim 1 (previously presented): A solid cosmetic composition comprising:

- (i) a water dissolvable solid carrier comprising a destructured starch;
- (ii) a fragrance deposited onto the solid carrier; and
- (iii) at least one cosmetic agent incorporated into the solid carrier in an amount from about 0.001 to about 50% by weight and wherein the composition is a solid cosmetic.

Claim 2 (previously presented): The composition according to claim 1 wherein the destructured starch is a zeamays starch.

Claim 3 (original): The composition according to claim 1 wherein the composition is in a form selected from the group consisting of tablets, pellets, beads and sheets.

Claim 4 (original): The composition according to claim 1 wherein the cosmetic agent is selected from the group consisting of surfactants, emollients, humectants, conditioners, sunscreens, anti-aging actives and mixtures thereof.

Attorney Docket No.: J6834(C)  
Serial No.: 10/667,922  
Filed: September 22, 2003  
Confirmation No.: 9900

Claim 5 (original): The composition according to claim 1 which is in a honeycomb shape.

Claim 6 (original): The composition according to claim 5 wherein the honeycomb is formed from a plurality of sections, each of the sections defined by a fracturable perimeter allowing separation of the section from the honeycomb.

Claim 7 (canceled)

Claim 8 (original): The composition according to claim 1 wherein the fragrance is present in an amount from about 0.001 to about 10% by weight of the composition.

Claim 9 (original): The composition according to claim 1 wherein the destructured starch is present in an amount from about 10 to about 100% by weight of the solid carrier.

Claim 10 (previously presented): A foamed solid cosmetic composition comprising:

- (i) a water dissolvable foamed solid carrier comprising a destructured starch;
- (ii) a fragrance deposited onto the foamed solid carrier; and
- (iii) at least one cosmetic agent incorporated into the foamed solid carrier in an amount from about 0.001 to about 50% by weight and wherein the composition is a foamed solid cosmetic.

Serial No.: 10/667,922  
Filed: September 22, 2003  
Confirmation No.: 9900

Claim 11 (previously presented): A solid cosmetic composition comprising:

- (i) a water dissolvable foamed solid carrier comprising a destructurized starch;
- (ii) a fragrance deposited onto the foamed solid carrier; and
- (iii) at least one cosmetic agent incorporated into the foamed solid carrier in an amount from about 0.001 to about 50% by weight and wherein the composition is a solid cosmetic.

Claim 12 (previously presented): The composition according to claim 1 wherein the destructurized starch is a molecularly homogeneous material with both amylase and amylopectin dispersed uniformly throughout the material and is amorphous having no ordered molecular structure.

Claim 13 (previously presented): The composition according to claim 12 wherein amylase content is at least 45% by weight of the material.

Claim 14 (previously presented): The foamed solid cosmetic composition of claim 10 wherein the destructurized starch is a molecularly homogeneous material with both amylase and amylopectin dispersed uniformly throughout the material and is amorphous having no ordered molecular structure.

Claim 15 (previously presented): The foamed solid cosmetic composition of claim 14 wherein amylase content is at least 45% by weight of the material.

Filed: September 22, 2003  
Confirmation No.: 9900

Claim 16 (previously presented): The solid cosmetic composition according to claim 11 wherein the deconstructurized starch is a molecularly homogeneous material with both amylase and amylopectin dispersed uniformly throughout the material and is amorphous having no ordered molecular structure.

Claim 17 (previously presented): The solid cosmetic composition according to claim 16 wherein amylase content is at least 45% by weight of the material.

Claim 18 (previously presented): The foamed solid cosmetic composition of claim 10 wherein the deconstructurized starch is a zea mays starch.

Claim 19 (previously presented): The solid cosmetic composition according to claim 11 wherein the deconstructurized starch is a zea mays starch.

Claim 20 (presently presented): The solid cosmetic composition according to claim 1 wherein the deconstructurized starch is present in an amount from 50 to 100% by weight of the solid carrier.

Claim 21 (previously presented): The solid cosmetic composition according to claim 1 wherein the deconstructurized starch is present in an amount of about 100% by weight of the solid carrier.
